

# THE FAYETTE FALCON.

ESTABLISHED 1866.

SOMERVILLE, TENNESSEE, FRIDAY, NOVEMBER 19 1920.

NEW SERIES: VOL. XIV.—NO. 21

## Publication Notice

In the County Court of Fayette County Tennessee, at Somerville. Gray's Creek Drainage District of Fayette and Shelby Counties, Tennessee.

Notice is hereby given to all persons, firms and corporations, concerned as owners, lien holders, incumbrancers, incumbrances, mortgages, occupants, or in any other way interested, whether residents of the State of Tennessee, or non-residents of this State, of the hearing on the 30th day of November 1920, before the County Court of Fayette County, Tennessee, at the Court house in Somerville, Tennessee, of the petition on file in this proceeding, and of the report of the engineer of the preliminary survey, profiles and all exhibits to said report, for the purpose of determining whether said drainage district and improvements set forth in said petition and proceedings shall be established and taking all necessary steps and the proceedings to establish the same as provided by law, the lands embraced in said drainage district being all the lands in Gray's Creek Bottom on both sides of said creek subject to overflow from a point on the lands of W. R. Reddit in Shelby County, Tennessee, to a point on the lands of T. L. Sward in Fayette County, Tennessee, said lands being partly in Shelby and partly in Fayette Counties Tennessee, and more particularly set out and described in the report, map, blue-print drawings and profiles of the engineer, said petition on file herein and all proceedings herein being hereby referred to for further information as to the purpose of said hearing.

It is further ordered that this notice be published for two consecutive weeks in the Memphis Press, a news paper published in Memphis, Shelby County, Tennessee, and for two consecutive weeks in the Fayette Falcon, a weekly news-paper published in Somerville Fayette County, Tennessee.

Done by order of the Court, this 17th day of November, 1920.  
C. W. CRAWFORD,  
Clerk of the County Court of Fayette County, Tennessee.

## Perched On A High Stool In An Office

Many a Brain is Trying to Work  
With Weak, Thin Blood

MORE RICH, RED BLOOD

Pepto-Mangan Gives You the  
Health To Tackle Your Daily  
Work With Vigor

If you sit at a desk all day in an office, whether you are perched on a high stool or seated in an upholstered chair your body is inactive. You can't get much fresh air and outdoor exercise. Your blood becomes poor. You look pale and feel weak.

The great tonic, Pepto-Mangan, is what you need for awhile. It makes rich, red blood. It restores your vital energy. Your color comes back.

When your blood is good, full of red corpuscles, you are better able to resist disease. You go about your daily work with optimism of good health.

Try Pepto-Mangan and notice how you improve.

Pepto-Mangan is sold in both liquid and tablet form. Take either kind you prefer. Both have the same medicinal value. But be sure you get the genuine Pepto-Mangan—"Gude's". The full name, "Gude's Pepto-Mangan" should be on the package.

Adv.

## Helped Father and Son

"Ziron Did Us Both Good," Writes Mr. Gentry,  
of Norene, Tenn.

It is a well-known medical fact, that iron is a necessary constituent of the blood, and that blood lacking iron is the cause of many troubles that only iron will cure.

Ziron, a scientific compound of iron with other valuable ingredients, is the remedy to take when your blood needs more iron, and your system requires a tonic. Ziron is mild and harmless, does not stain the teeth, and is good for children as well as adults.

Rev. P. G. Gentry, of Norene, Tenn.,

## Rural Carrier Examination

The United States Civil Service Commission has announced an examination for the County of Fayette to be held at Somerville on December 10, 1920 to fill the position of rural carrier at Somerville and vacancies that may later occur on rural routes from other post offices in the above-mentioned county. The salary of a rural carrier on a standard daily route of 24 miles is \$1,800 per annum, with additional \$50 per mile per annum for each mile or major fraction thereof in excess of 24 miles. The examination will be open only to citizens who are actually domiciled in the territory of a post office in the county and who meet the other requirements set forth in Form No. 1977. Both men and women, if qualified, may enter this examination, but appointing officers have the legal right to specify the sex desired in requesting certification of eligibles. Women will not be considered for rural carrier appointment unless they are the widows of U. S. soldiers, sailors, or marines, or the wives of U. S. soldiers, sailors, or marines who are physically disqualified for examination by reason of injuries received in the line of military duty. Form No. 1977 and the application blanks may be obtained from the officers mentioned above or from the United States Civil Service Commission at Washington, D. C. Applications should be forwarded to the Commission at Washington at the earliest practicable date.

## A Lady in Chicago Telegraphs for Rat-Snap

Read Mrs. Phillips' wire; Youell's Exterminator Co., Westfield, N. J. Rush \$3 worth of RAT-SNAP. Later rec'd following letter, RAT-SNAP arrived. It rid our house of rats in no time. Just moved here from Pa., where I used RAT-SNAP with great results. Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by G. W. Locke, Rhea Drug Co., & W. S. Shinnault.

## Sheep Make Waste Pasture Into Meat

The keeping of a reasonable number of sheep on the average farm does not necessitate the keeping of fewer dairy cows or other grazing stock. This fact was determined by the United States Department of Agriculture in its recent investigation of sheep-raising possibilities. It was found that farms where sheep are kept successfully have practically the same number and kinds of other livestock as other farms of like area where no sheep are kept, and that the acreage in crops on the two classes of farm is substantially the same. The inference is that the farmer who keeps no sheep is simply throwing away enough pasture that cows and other livestock do not utilize to net him a profit.

Regulate the bowels when they fail to move properly. HERBINE is an admirable bowel regulator. It helps the liver and stomach and restores a fine feeling of strength and buoyancy. Sold by Price Drug Co.

Mr. P. LaDuke, Farmer, Says, "You Bet Rats Can Bite Through Metal"

"I had feed bins lined with zinc last year, rats got through pretty soon. Was out \$18. A \$1 package of RAT-SNAP killed so many rats, that I've never been without it since. Our little dog never touched RAT-SNAP." You try it. Three sizes 25c, 50c, \$1.00. Sold and guaranteed by G. W. Locke, Rhea Drug Co., W. S. and Shinnault.

## Teachers' Examination

The County Superintendent has received from the State Superintendent schedule of Examinations which are to be held in Somerville and thruout the State on Friday and Saturday, December 3 and 4, and the attention of teachers who have not yet secured certificates is called to it.

A few teachers who taught during the summer have left the county to go to school, and a few vacancies have occurred for other reasons, leaving in the county schools a half dozen vacancies for the sessions after Christmas. There are not available licensed teachers for these positions in the county and those who would like to teach are asked to take the examinations on the date named. It is no longer possible to secure certificates except by taking the examinations and it is hoped a sufficient number will take these in December to fill all the vacancies in the schools.

In the colored schools there are at least twenty five vacancies and not a licensed teacher in the county who is not employed, so far as it is known. These schools want teachers and the school authorities would be glad to fill the places, but no teachers can be put in one of these places until he has a certificate. This is the last examination that will be held for certificates for the coming winter terms of the schools.

Following is the schedule:  
Friday, December 3,—9:00-9:15, Read rules and sign cards; 9:15-10:00 Music; 10:00-11:45 Arithmetic; 11:45-12:15, Spelling; Noon; 1:00-2:00, Reading; 2:00-3:30 Grammar; 3:30-4:30, Physiology.

Saturday, December 4—9:00-10:00, Theory and Practice; 10:00-11:00, Geography; 11:00-12:00 U. S. History; Noon; 1:00-2:30, Tennessee History.

HIGH SCHOOL  
Friday, December 3—9:15-10:15, Grammar; 10:15-11:45, Geometry, English History, Cicero, Physics, Cooking; 11:45-12:15, Spelling; Noon; 1:00-2:30, English Literature, American History, Vergil, Physical Geography, Household Management; 2:30-4:00, Rhetoric, Chemistry.

Saturday, 4—9:00-10:30, American Literature, Algebra, Caesar, Agriculture, Sewing; 10:30-12:00, Arithmetic; 1:00-2:00, Civics, Biology; 2:00-2:15, Ancient Medieval, Modern History, Physiology; 3:15-4:15, Theory and Practice.

The composite group is composed of Spelling; Grammar; Arithmetic; Rhetoric; American History; Algebra; Ancient History, Theory and Practice; and Biology. These can be taken as scheduled.

## Only a Cold

Are you ill? It is often answered—"Oh! it's only a cold," as if a cold was a matter of little consequence, but people are beginning to learn that a common cold is a matter not to be trifled with; that some of the most serious diseases start with a cold. As soon as the first indication of a cold appears take Chamberlain's Cough Remedy. Remember that the sooner you get rid of your cold the less the danger, and this remedy will help you to throw it off.

James Watson Says, "I'll Never Forget When Father's Hog Got Cholera"

"One morning he found 20 hogs dead and several sick. He called to the Vet. who after dissecting a rat caught on the premises, decided that the rodents had conveyed germs. Since then I am never without RAT-SNAP. It's the best, quickest rat destroyer I know." Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by G. W. Locke, Rhea Drug Co. and W. S. Shinnault.

## Terracing Advantages Given By Specialist

Farmers in several different counties in Tennessee are being given an opportunity to get some first hand information and see some actual work in terracing this fall. Demonstrations in ditching and plowing for moisture, dams, water and soil conservation are being conducted under the direction of H. B. Bliss, rural engineering specialist of the Division of Extension. Some of these demonstrations have already been held and others are scheduled and the farmers are showing a lively interest in them.

In speaking of the need of terracing in Tennessee, Mr. Bliss states that each year thousands of acres are being washed away, and gullies becoming deeper and wider. Evidence of this is seen on every side. Practically every farm is suffering from soil loss and lack of moisture on certain areas during the summer months due to the fact that the water which falls on the land runs off as fast as it falls, carrying the soil with it instead of soaking in and providing a moisture reservoir to supply the plant at a needful time. Terracing is the first step in soil preservation and reclamation of gullied hillside. This method of saving the land from washing and conserving the rainfall of the winter for use during the crop growing season is being followed by many farmers thruout the State at present and all who have tried it are finding it of great benefit.

Advantages of terracing:

1. Stops the soil from washing, which is one of the heaviest soil losses.  
2. Helps prevent the humus from washing away. Loss of humus means low yields.

3. Conserves the moisture on the side hill by holding the water and giving it a chance to soak into the terrace and on down the hill slope under the surface. It may be the means of saving a crop from drought. When not terraced the side hills absorb less moisture ordinarily than any other part of the farm.

4. Enables the farmer to build up his farm despite the destructive action of water.

## WOMEN'S WOES

Somerville Women are Finding Relief at Last

It does seem that women have more than a fair share of the aches and pains that afflict humanity; they must "keep up," must attend to duties in spite of constantly aching backs, or headaches, dizzy spells, bearing-down pains; they must stoop over, when to stoop means torture. They must walk and bend and work with racking pains and many aches from kidney ills. Keeping the kidneys well has spared thousands of women much misery. Read of a remedy for kidneys only that is endorsed by people you know.

Mrs. Chas. Starks, Somerville, says: "Some years ago I had a very severe attack of kidney complaint. My back nearly killed me. It ached night and day and such a thing as doing my housework was out of question. I had sick headaches, and would have to go and lie down. Flashes of light would appear before my eyes, too. A friend of mine advised me to try Doan's Kidney Pills, and I did. Doan's completely cured me and I have never had any return symptoms of kidney trouble since."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Starks used. Foster-McBarn Co., Mfrs., Buffalo, N. Y.

## State Veterinarian Urges Farmers to be on Look-Out for Cholera

Reports coming from surrounding states, especially those of the North indicate that virulent form of hog cholera is prevalent at the present time according to Dr. M. Jacobs state veterinarian. Fortunately this epidemic has not as yet spread into Tennessee to any alarming extent, he says, but the attention of farmers is being called to it, in order that they may be on their guard so as to give proper protection to their hogs at the earliest possible moment, in case the situation become dangerous. There are certain fundamental facts about Cholera which every hog owner should remember, and which the Cholera Control Division has tried to impress. They are as follows:

1. Hog Cholera is a highly contagious disease.  
2. When hogs become sick and begin to die, always suspect Cholera.

3. In at least 95 per cent of cases, when hogs become sick and begin to die, it is cholera and not some other disease.

4. All sick and exposed hogs must be held in quarantine and therefore should not be allowed to run at large nor have access to public highways or running water thru the premises.

5. The carcasses of all hogs dying of Cholera must be disposed of by burning.

6. The only positive means of preventing Hog Cholera is by vaccinating with anti-hog cholera serum and virus.

7. Do not permit your hogs to be vaccinated by anyone who does not hold a State permit issued on, or after February 10, 1916. These permits are in effect.

8. Do not wait until the disease spreads thru practically the entire herd before having your hogs vaccinated.

9. Anti-Hog Cholera Serum is a preventive and gives good results, if used before the hog actually becomes sick.

10. Feed hogs very lightly for at least two weeks after vaccination.

Everyone is either directly or indirectly interested in the swine industry and should be willing to do their part in the control and eradication of this very fatal disease. Heavy losses can be avoided if hog owners will observe the foregoing suggestions and give their full co-operation in an effort to check it, says Dr. Jacob.

Irregular bowel movement leads to chronic constipation and a constipated habit fills the system with impurities. HERBINE is a great bowel regulator. It purifies the system, vitalizes the blood and puts the digestive organs in fine vigorous condition.
